

Energy Policy

Energy Policy

(October 2016)

- The City of Dublin Education and Training Board (ETB) is committed to providing a safe, comfortable working and learning environment and providing a high level of safe sustainable energy to allow City of Dublin ETB to protect our environment.
- City of Dublin ETB is committed to a responsible energy policy with the full inclusion of all staff, students and senior management working together to achieve a realistic level of energy reduction across all centres.
- City of Dublin ETB will raise energy awareness and encourage responsible energy usage across the organisation by providing continuous energy awareness and training to all staff and students.

City of Dublin ETB is committed to:

C **Communicating** to all our staff and students the benefits of improved energy savings across the organisation

D **Developing** and maintaining continuous improvement in energy usage performance and subsequently incurring savings on CO2 emissions and our commitment to a better environment.

E **Eliminating** unnecessary fuel usage by targeting reductions in energy usage across the organisation.

T **Taking** our staff and students on a journey of learning to protect our environment.

B **Benefits** – by implementing this policy we will reduce energy costs which will allow City of Dublin ETB to reinvest the money saved to create a better environment for staff and students. By becoming a low energy user we will create a positive public image of our organisation.
